GLOBALSTAR SOFTCASE (GSC-1410)

“The Ultimate Portable Accessory”

The Globalstar-Certified SoftCase (GSC-1410) from NavCom Digital is a unique accessory available for the Globalstar GSP-1600 portable satellite phone. Designed to be easily transported, the SoftCase combines the Globalstar Vehicle Kit (GCK-1410) with a custom made, rugged ballistic nylon case. Installation of the satellite phone is as easy as placing the portable handset into the mounting cradle, plugging in the cigarette lighter power adapter, and mounting the magnetic mount antenna in any area that has a view of the sky. The SoftCase allows use of the satellite phone within an enclosure that would normally require a fixed satellite phone.

The SoftCase is the ultimate versatile and easy to use accessory. It provides a Privacy Handset (CGK-0008) and a hands-free microphone and speaker. The external antenna features an 16-foot (5 m) cable that connects the Globalstar Electronic Module (GEM) or 'black box' securely enclosed within the SoftCase. In addition to the standard length cable there are 30 and 45-foot (9.1 and 13.7 m) antenna cable options available. An optional external cellular antenna can be easily connected to access 800 MHz AMPS or CDMA cellular service.

The SoftCase has an RS-232 data interface makes it easy to attach a computer to send or receive e-mail, fax, or access a web page. A 6-foot (1.8 m) serial data cable is included.

The SoftCase is powered by a 12 volt DC or 110-220 volt AC power with included adapters. There is a convenient LED power-on indicator.

As an added feature that is unique to the SoftCase, NavCom Digital designed the GSC-1410 to fit precisely within the rugged Pelican 1450 hard case. In effect a 'combo case,' this allows the SoftCase to be conveniently made waterproof and crushproof. This option allows the SoftCase to be safely checked as baggage or shipped with no additional container.

In addition to being watertight, the Pelican case is unbreakable, dustproof, chemical resistant, and corrosion proof. It is made of Ultra High Impact structural copolymer that makes it extremely strong and durable. Its exclusive 1/4-inch (6.4 mm) neoprene o-ring and ABS latches seal perfectly. Each case is lockable and includes an automatic purge valve for quick equalization after changes in atmospheric pressure. A nameplate is included that can be personalized by engraving at slight additional cost. Pelican cases are available in black, silver, yellow, and orange.

The Pelican 1450 case is NATO codified and tested to MIL C-4150J (Military Standard), IP-67 (Ingress Protection) and carries a lifetime free replacement warranty. Outside dimensions: Length 16-inches (40 cm), Width 13-inches (30 cm), Height 6 7/8-inches (17 cm).
